Welcome to the Diabetic Mommy Get-Together in Hershey!

At Holiday Inn Harrisburg East

SCHEDULE

Friday, July 11

Arrival and Check-in

5:00 - 7:00 p.m.

Pizza party by the indoor pool.

Saturday, July 12

8:30 - 9:30 a.m.

Buffet Breakfast served in the Keystone Suite

9:30 a.m.

Presentations by

Diabetic Mommy Manager, Laura Guthrie, MS

and

CureDM, Inc. Chief Scientific Officer, Claresa S. Levetan, MD, F.A.C.E.

During breakfast we will confirm plans for the day for those going to Hershey Park as well as plans for the evening for those staying at the hotel.

Sunday, June 1st

Check-out (11 a.m.) and Departure

Laura M. Guthrie, M.S, Diabetic Mommy Manager

Laura is the proud mommy to 9 year old Gabby and almost 5 year old Gracie. She joined Diabetic Mommy in 2002 after her GD pregnancy with Gabby and shortly after becoming diagnosed as Type 1. With exercise and diet alone during her Gestational Diabetes pregnancy, she delivered a healthy daughter, Gabby, at 39 weeks.

Over the following 9 months she slowly lost weight and was told she was suffering everything from post-partum depression, to an eating disorder, to normal new-mommy anxiety. She visited specialist after specialist before a new doctor finally gave her a standard fingerstick that read "HI". An A1C over 10 confirmed the diagnosis. Initially she was told she was Type 2 due to her age, but her dramatic weight loss was indicative that perhaps this diagnosis didn't fit. Three forms of oral medications were tried before making the switch over to insulin.

With a Type 1 mother, she and her sister were watched since childhood for signs of diabetes. Her mother was given the false information that children of diabetic mothers blood sugars typically run higher than an average child. At age 12 she was considered borderline diabetic and was fine as long as she monitored her diet and stayed active.

In 2003 she and her husband Sean expanded their family again with the arrival of Gracie, her type 1 pregnancy. This pregnancy was a different experience in many ways. This time she had the ability to control her sugars with insulin and a doctor who worked closely with her to adjust her insulin as often as needed. Gracie was born at 34 weeks due to severe pre-eclampsia. She spent 5 days in the NICU and has no long term effects of her prematurity.

When she's not home being mommy and wife, she holds the title of Supervisor of Psychological and Diagnostic Services for a school system in West Virginia. Her job entails evaluating students for special education, serving as a consult to staff, parents, and students, and making recommendations for behavior and educational needs. She serves as the county coordinator for Section 504 of the Americans with Disabilities Act and serves as the administrator over four other school psychologists. As a diabetic herself, she has become the county resource to parents, school nurses and staff whenever a newly diagnosed child enters the system.

She was recently trained by the American Diabetes Association as an advocate for Southwestern Pennsylvania and attended the Call to Congress to lobby and advocate for the continued funding for Type 1 research, special populations programs, and the Americans with Disabilities Restoration Act. She also spoke at the 1st Annual Diabetic Mommy Get-Together in Las Vegas in 2007.

In 2004, Laura was invited to be one of the first co-hosts for Diabetic Mommy. In 2005 she was promoted to Manager and continues to be a vital support in the forum.

Claresa Levetan, M.D., F.A.C.E. and CureDM, Inc., Chief Scientific Officer

Dr. Claresa Levetan is a noted endocrinologist with expertise spanning diverse areas of diabetes. She has been internationally recognized for the translation of science and technology into improved health care options for patients with diabetes. Dr. Levetan's current research focus is identifying peptides in the human proteome, which differentiate progenitor pancreatic cells into new islets.

In 2007, Dr. Levetan received the American College of Endocrinology's Highest Distinction in Clinical Endocrinology Award that is presented annually to the endocrinologist recognized as having achieved distinction in the field of clinical endocrinology; and has a sustained record of devotion to teaching the art and science of endocrinology.

She served as an associate editor of the journals, *Clinical Diabetes* and *Diabetes Forecast*. Upon completion of two terms as associate editor of the American Diabetes Association's journal, *Clinical Diabetes*, Dr. Irl Hirsch, the Editor in Chief, wrote in an editorial, "Dr. Resa Levetan is perhaps the most creative physician I have ever met. Her ideas for developing interesting articles, translating new information to others, and getting physicians, patients, and their families involved with diabetes to obtain better outcomes are truly inspired."

Dr. Levetan's has been on the forefront of diabetes research and has been published in many medical journals including the *American Journal of Medicine*. She has testified before the U.S. Congress on the economic and health benefits of empowering patients to take a more active role in their own care. She has led research teams in the areas of methods to prevent and reverse diabetes, and was an investigator on the NIH's Diabetes Prevention Program and Women's Health Initiative.

She is actively involved in reviewing diabetes scientific articles for the *Journal of the American Medical Association*, *Diabetes Care*, *Endocrine Practice* and many other physician and patient publications. She was the co-chair of the American College of Endocrinology's Diabetes Outpatient and Inpatient Consensus Conferences.

Dr. Levetan served on the steering committee of Medicare and National Committee for Quality Assurance's (NCQA's) and Diabetes Quality Improvement Project (DQIP). She served on the Board of Directors of the American Association of Clinical Endocrinologists and was on the Board of Trustees of the American College of Endocrinology.

Dr. Levetan is a graduate of Emory University School of Medicine. She was Professor of Medicine and Chief of Endocrinology, Diabetes and Metabolism at Medical College of Pennsylvania Hospital and Drexel University College of Medicine and is now Chief Scientific Officer of CureDM Inc., which she co-founded. She is a clinical professor at the Lankenau Institute for Medical Research at Lankenau Hospital/Jefferson Health System in Wynnewood, Pa.

CureDM, Inc. is a biopharmaceutical company established to develop new therapies that may prevent, ameliorate or reverse diabetes and allow for the discontinuation of insulin.

The research team at CureDM has discovered and is developing a novel human peptide associated with regeneration of insulin-producing islets within the pancreas. This peptide is called Human proIslet Peptide (HIP) and stimulates the differentiation of new insulin-producing islets from existing adult pancreatic progenitor cells. Restoration of pancreatic function may be achieved, without the use of stem cells by clinical treatment with this peptide therapeutic. The CureDM approach is to restore, maintain and protect new insulin-producing islet structures in patients with diabetes.

Products will be licensed out or partnered to pharmaceutical companies who have an established commercial track record and presence for distribution, sales and marketing in all or selected geographic or therapeutic areas.

Until a decade ago, it was believed that the number of insulin-producing cells that one is born with, is the total number one has for a lifetime. We now know that a small percentage of insulin-producing beta cells are housed within a structure known as the Islets of Langerhans. The population of beta cells expands and contracts with our dietary habits. The islets in which they are housed also die and are regenerated at a very slow rate of turnover.

Islet of Langerhans CureDM's novel Human proIslet Peptide (HIP) is hypothesized to stimulate and enhance the islet regeneration process that occurs naturally to create new structures that house a new pool of insulin-producing cells from the precursor cells in adult pancreatic tissue. As new islets are formed, not only is the secretion of insulin restored, but also, other hormones that are missing among type 1 diabetes patients, such as amylin, are also restored. In addition, the physiological control for these important hormones is also restored.

Our research is based on the concept of Islet Neogenesis, which has the potential for reversal of diabetes.

The benefits of this approach are:

- * No embryonic stem cell research required
- * Involves naturally occurring human proteins
- * No global immune suppression such as that required for islet transplants
- * Uses specific targeted immune agents designed solely to block the attacking antibodies found in type 1 diabetes patients, which have been shown to preserve islets
- * Restores pancreatic islet function and glycemic control resulting in normal glucose metabolism
- * Restores production of other islet hormones deficient or missing in type 1 diabetes
- * This new therapy will apply to both newly diagnosed type 1 and longstanding diabetes, as well as type 2 patients who require insulin.

THINGS TO DO

Hershey, PA - Chocolatetown USA

See the downtown street lights shaped like Hershey Kisses, Hershey's Chocolate World and the factory tour, Hershey Park with their water rides, roller coasters, water roller coaster, and a grand mix of rides for all ages. Shop at the Outlets at Hershey, stay a cool 52 degrees at Indian Echo Caverns, ride the M & H Railroad train in Middletown, or race go-karts or play mini golf at Adventure Sports just 2 miles from us. For concerts, Hershey Bears hockey, and more check out the Giant Center. For you antique auto buffs, be sure to visit the Antique Auto Museum at Hershey for a display of over 90 historic automobiles and buses in dramatic period settings. If you're up for a short trip you can visit Cabela's, the ultimate hunting, fishing and outdoor gear store!

Hershey's Chocolate World

251 Park Boulevard
Hershey, PA 17033
(717) 534-4900

Fun and sweetness meet adventure and excitement at HERSHEY'S CHOCOLATE WORLD attraction, a totally interactive chocolate experience for everyone and a shopper's paradise for anything and everything HERSHEY'S. Learn about the process of making chocolate on HERSHEY'S GREAT AMERICAN CHOCOLATE TOUR, Create Your Own Fun with uniquely personalizable items at HERSHEY'S FACTORY WORKS attraction, see the HERSHEY'S Product Characters come to life on the big screen in HERSHEY'S REALLY BIG 3D SHOW, and treat yourself to our delicious food and desserts at our KIT KAT Café or Courtyard Café.

Hershey Gardens

170 Hotel Road Hershey, PA 17033
717-534-3492

Open 9 am – 8 pm

Regular \$10.00

Seniors (62+) \$9.00

Junior (3-12) \$6.00

Children under 3 and members are FREE.

It's filled with surprises at every turn. This magical world of whimsy provides a self-guided learning environment

designed specifically for children. Kids of all ages are enchanted as they scamper, climb and dance throughout the 30 colorful theme gardens. The Children's Garden even makes it fun to learn the ABCs, colors, counting and math!

ZooAmerica

100 West Hershey Park Drive Hershey, PA 17033

Tel: 717 534 3900

Regular (ages 9-54) \$8.50

Junior (ages 3-8) \$7.50

Senior (ages 55+) \$7.50

Children (ages 2 and under) FREE

Visit ZOOAMERICA North American Wildlife Park, our 11-acre walk-through zoo featuring more than 200 animals from North America.

Hershey Trolley Works

717 533 3000

Located inside Hershey's Chocolate World

Journey through America's sweetest town on an old fashioned trolley car. The inspirational legacy of Mr. Hershey unfolds in a unique entertainment experience. Military Discount: \$8.50

Infants (2 and younger): Free Admission

At The Crayola FACTORY visitors enter a world of discovery as they experience more than a dozen hands-on activities as well as learn how Crayola Crayons® and Markers are made.

Diabetic Mommies

Anne a.k.a. amf320

My name is Anne Faber and I'm originally from the Chicago area but I currently live in Lancaster, Pennsylvania. I was diagnosed with Type 1 diabetes in August 2004 and I have been on a Medtronic MiniMed Paradigm 715 pump, using Novolog, since July 2005. I have been married to my husband Michael since July 2004 and we have a healthy 8 month old son named Andrew.

Grace a.k.a. Gevans1011

Type 1 - diagnosed age 27 - June 2004
Using a Cozmo Insulin Pump
From Northern New Jersey
2 Miracle Babies.....Moriah born 12/7/05
.....Rose born 12/18/07

Being diagnosed as a type 1 as an adult was very difficult. My whole life and world had been turned upside down. When first diagnosed and a few months afterwards I had a very hard time controlling my blood sugar on MDI. I had a lot of side affects from the uncontrolled blood sugars and felt awful. Two things really helped me gain control of my life again and feel like I could still live a normal life.

The first was going on an insulin pump. I was able to regulate my blood sugars and lower my A1c and feel healthy again. I love my insulin Pump!

The second was finding DiabeticMommy. I became pregnant 9 months after being diagnosed type 1 and was so scared and lost. But then I found DM early in my 1st pregnancy and these wonderful ladies helped me so much with information, support, friendship, and

encouragement throughout that pregnancy and afterwards. Here it is 3 years and 2 healthy children later. It is so wonderful to have a place to go and people to share with that understand me and understand life as a diabetic. DiabeticMommy is not just a website I visit it is a place that consider the people there my family. I am so truly thankful for DiabeticMommy. Finding them was an answer to prayer.

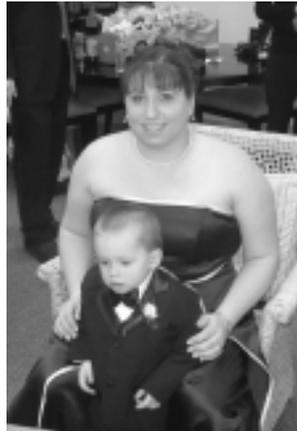

Holly a.k.a. Shhhh! They are gonna kick us out! a.k.a. hollyferry

I was diagnosed in October 1998 as Type 1 diabetic. I had a bad kidney infection, and the doctors feel that the kidney infection lead to the autoimmune response which caused my diabetes. I was on MDI for a while, and was while pregnant.

I got pregnant with Jason in October 2004. I had him 38 weeks later on July 10, 2005. He was born perfectly healthy at 6.0 lbs and 18.5". He had no health problems at all. I credit my sanity while pregnant to being able to find advice and someone who was going through it to on www.diabeticmommy.com. Now I am a co-hostess for the website.

In February 2006 I got my first insulin pump—a Deltec Cozmo. I LOVE MY PUMP! I would recommend one to any diabetic.

In 2008 we will be TTC #2 to hopefully give Jason a little brother or sister. I am also in the process of getting the Abbott Navigator CGMS.

I have been married to Dan since 2001—and we have 2 dogs; Spooky & Oreo...and a few assorted fish and snails.

 **Animas**[®]
C O R P O R A T I O N
a *Johnson & Johnson* company

Jenni a.k.a. Fun2Dream

Married to: Scott

Hometown: Northern Virginia

"Kids": Corgan and Cash - adorable pups

TTC #1 this summer

Type 1 since 8/10/87

Cozmo Pumper

Laura a.k.a. gabsmom2

age 35

type 1 for 9 years

GD with first pregnancy and dx 9 mos after her birth as type 1

Minimed pump user since May 2006

wife to Sean for 11 years

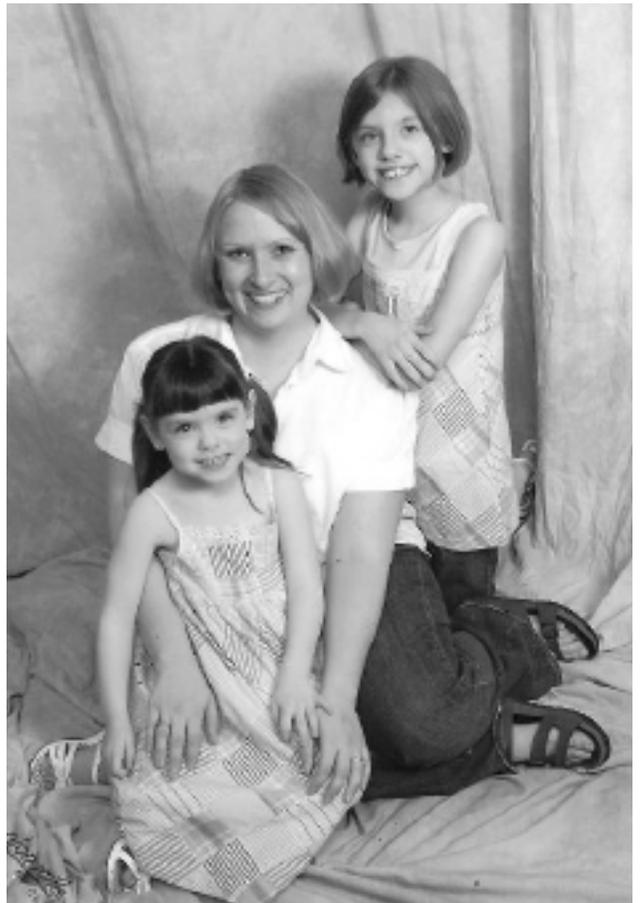

momma to Gabby (age 9) and Gracie (age 4 1/2)

Coordinator of Psychological Services for large county school system

Manager of Diabetic Mommy

Trained advocate for the American Diabetes Association

Privileged speaker at the Diabetic Mommy Luncheon in Las Vegas in 2007

Lisa a.k.a. Lisa51178

I live currently in Washington D.C., originally from the great state of Colorado. I am expecting my first child in February with my professional poker player/foreign policy analyst husband Justin. I am type 1.5 am hoping I am pumping by the time of this publication, have been on lantus and novolog. I would just like to take this opportunity to say "Go Broncos"!!

Lori a.k.a. Klitschkofan

My name is Lori. I am 38 and have been type 1 diabetic since 1979. I've been using a Minimed Paradigm insulin pump since 2003. I have been married for 8 years to Bob and have a 2-year old son, Bobby. My other babies are 3 cats Romeo, Juliet and Olena.

Mary a.k.a. Maribelle7

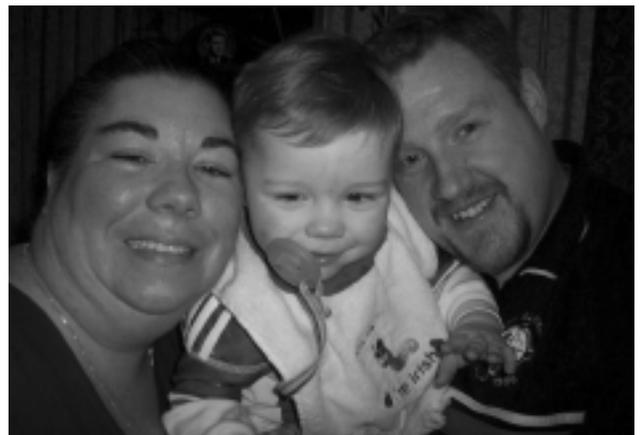

State: NY

Age: 38

Married to Clive and mom to Liam, age 2

Work full time as a Corporate Law librarian in major NYC law firm

I found out I was pregnant in December 2005, just a few months after moving into our first home. Two major events one on top of each other! I was already seeing a perinatologist for other medical issues, so when I was dx'd with GD, I was able to get help right away with it. I began using insulin almost right away, and counting carbs. Other than that I had a pretty great pregnancy, and Liam was born at 37 weeks and 5 days, on August 3rd, 2006. I am now what is considered "pre-

diabetic" but due to busy work schedule and hectic family life, I haven't been keeping track of my sugars as well as I should be. I hope that the 2nd half of 2008 will be less crazy and I can get back on board with my numbers and get them under control.

Samantha a.k.a.

spacheco13/sam/brody's mom

My name is Samantha and I am 28 years old. I live in Massachusetts. I am coming to Hershey with my baby son, Brody, and my sisters Ashley and Jackie. Brody is 10 months old now. I have had Type 1 for 13 years and I have been on an Animas pump for 3.5 years. I am married to Jason and have been for 3 years (although we have been together for 9 years).

Sharon a.k.a. Cinnamon Lipstick

I've had Type 1 diabetes since I was 13 months old, so 32 years this month. I began pumping a few months after Joe and I started dating in March of 2000. I used a Minimed for 8 years and am now wearing a green Cozmo named Elphaba. I'm the proud mom of Miriam who was born September 20, 2005. My pregnancy was fairly routine, at least from a Diabetic Mommy standpoint. I've been married to Joe since November of 2001. He's my best friend and is such a wonderful support. He helped me tremendously through my pregnancy and we are now starting to get ready to TTC #2 soon. We live in the suburban Philadelphia area. I'm also a proud Diabetic Mommy Manager.

Shawna a.k.a. ShawnaLT1/Whyatts Mommy

I am a T1 on a PURPLE Cozmo pump. I am due for miracle baby #2 January 13, 2009. I have been a diabetic +/- a month since I was 4. So 30 years. I live in Arizona and LOVE the heat. My first little miracle, Whyatt, was born 8 weeks premature at 4# 15.2 ounces and 18" long. I strive to keep my A1C in a tight range, and my most recent has been 5.4%. I am always willing to help a person, when I can. I was dx with PCOS in 2007 and put on Metformin, great results. I am a SAHM and enjoy every second of being with my little man! I have been a member of DM for a little over 4 years, the first 18 months I didn't register and

was a "lurker" more or less. This is going to be a LOT of fun in Hershey!! Can't wait to meet you all!!!!!!!!!!

"Anna"

Nita, age 8 1/2
beloved friend of Tamara & Allen
Type 1 diabetes since age 3
MDI/pumper wanna-be
